

Policy No.: P300-15-1	Type of Policy: Operations
Policy Title: Water Supply, Storage, Conveyance, Quality and Conservation	
Policy Description: Provides guidance for addressing the current water supply challenges	
Approval Date: 10/20/2015	Last Review Date: 2015
Approval Resolution No.: 89-15	Next Review Date: 2019
Rescinded Resolution No.: 57-06	Rescinded Resolution Date: 11/21/2006

It is the policy of the Board of Directors of Dublin San Ramon Services District:

1. To meet continuously the water demands of existing customers and the needs of new development planned by the Cities of Dublin and San Ramon.
2. To maintain a safe, secure, and reliable water supply and water storage system so that the water supplied continuously meets full customer demands in no less than 85% of calendar years, and that 75% of water supplied continuously meets demands in no less than 99% of calendar years.
3. To diversify the sources of water supply so that no less than 60% of total demand (potable and recycled) is satisfied by local and regional water supplies, and that no more than 40% of total water supply (potable and recycled) comes from any one physical source.
4. To take measures to meet continuously the recycled water demands of DERWA 100% of time, which may include acquiring additional wastewater effluent supplies and/or off-season wastewater effluent storage.
5. Given the uncertainty of consistent water deliveries from the State Water Project, explore in partnership with other Tri-Valley agencies the development of an expanded or additional local water facility to supplement the groundwater basin when flows from the State Water Project are jeopardized.
6. To diversify the transmission system so that there are at least two independent conveyance systems for each water supply source to serve DSRSD's customers, and each conveyance system in concert with local storage facilities has the capacity to convey 70% of maximum day demands for extended periods of time.

Policy No.: P300-15-1

Policy Title: Water Supply, Storage, Conveyance, Quality and Conservation

7. To actively promote water conservation for commercial and residential customers, with a long-term goal of a permanent system-wide average annual residential potable use of no more than 70-gallons per capita per day.
8. To enhance the quality of the District's water supply.
9. With the exception of brine produced from recycling production, to discharge no treated wastewater to the Bay.
10. To seek grant opportunities and project partners so that the costs to District customers for implementing these policy objectives are acceptable.
11. To ensure that the ultimate beneficiaries of the water supply equitably participate in the funding of the costs associated with the acquisition and delivery of the water supply into the District service area.
12. These policy objectives can best be met through collaboration with the other Tri-Valley water agencies and cities, and regional water agencies.
